COMSYS SAS 9.2 Installation/Migration Service

OVERVIEW

As SAS Software has evolved, so has the complexity involved for installing and configuring a SAS environment. Companies spend valuable time and resources developing installation and configuration skills required to keep up with the latest SAS version requirements. Why not look for a more cost-effective solution such as leveraging COMSYS' expertise to help your organization plan for and implement the right SAS 9.2 migration plan?

COMSYS Business Analytics Practice, a trusted SAS Alliance Partner, can help you develop a road map for your upgrade to the newest version of SAS and help you to implement SAS 9.2 in your environment.

We offer the following upgrade services:

- New Installations
- Migrations from Previous SAS Versions
- Code Optimization for 9.2
- "Now vs. Later " Cost/Benefit Assessments
- Knowledge Transfer
- Ongoing Support

BUSINESS PROBLEM

Partnering with COMSYS Business Analytics for your upgrade will allow your employees to focus on tasks that affect the business' bottom line. COMSYS SAS 9.2 installation/migration support is designed to help our clients develop a strategy for their upgrade and to quickly and efficiently get them running on the new version.

SAS 9.2 BENEFITS

- New analytical algorithms and procedures
- The ability to process large and complex data sets faster.
- Greater functionality and administration of SAS EBI/BI
- More collaborative data integration
- A streamlined deployment and configuration process with new wizard-based interface.
- New standards for systems management, security, and change management.

Do business. **We're IT.**

Business Analytics

During our 9.2 service engagement, we will help you develop the following:

- A needs analysis that can answer questions such as “Is this the right time to move to 9.2?”
- Hardware and operating system preparation
- Pre-installation checklists
- SAS software component requirements for installation and configuration
- 3rd party software requirements
- Knowledge transfer of new features and functionality to user base

BUSINESS SOLUTION

By taking advantage of COMSYS’ experience across many customers and industries, you are tapping into a robust set of best practices developed over many years of consulting. Another benefit to your organization is that COMSYS can direct you to the new 9.2 features and functionality that can bring immediate value to your organization.

The COMSYS SAS installation/migration service is a great investment to allow your resources to focus on your business issues without being distracted by having to learn SAS administrative details. Just as your resources invest time in keeping up with best practices for your business; COMSYS is constantly making that investment in developing and observing best practices relevant for SAS environments.

Choose COMSYS Business Analytics Practice for all of your SAS 9.2 upgrade needs.
